

***Would you like to take a  
step towards living greener?***

***RideSolutions 43147*** is your connection to cleaner, more affordable transportation choices within Violet Township and Pickerington. As Americans, we love our cars. Did you know that the largest use of gas in our vehicles is for the commute to work? We think nothing of driving less than a mile to the bank, the store or even from one parking lot to another at a shopping center. These habits increase congestion and cause less safe roadways -- and the problems will increase as our community grows. With more congestion on the roads, many Pickerington and Violet Township commuters are looking for a better solution for their daily commutes.

There is good news: ***RideSolutions 43147*** commuters can share the ride to work, while saving on the cost of gas and improving the environment at the same time. Residents of Violet Township and Pickerington have a variety of alternative travel options such as carpooling, vanpooling, biking or walking.

The City of Pickerington, Violet Township, the Pickerington Area Chamber of Commerce, and the Mid-Ohio Regional Planning Commission's ***RideSolutions*** program has teamed up to bring you the ***RideSolutions 43147*** program where you can save money (see how much money it really costs to drive your car to work with compute to commute), win prizes and improve the air you breathe.
